

UNIA AUTOMATION

**THE HOME THAT
THINKS FOR YOU**

MASTER
LIVING TECHNOLOGY

The logo for UNA Automation features the letters 'UNA' in a white, sans-serif font. The letter 'A' is stylized with a green square above it and a white 'A' shape inside the square. To the right of 'UNA', the word 'AUTOMATION' is written in a white, sans-serif font. The background is a low-angle, dark photograph of a modern building with many windows.

UNA AUTOMATION

In today's home, comfort, control and energy savings go hand in hand.

Modern living demands spaces that adapt to you, not the other way around.

You want a home that responds to your habits, protects what matters most, and saves energy without compromising your lifestyle.

Master's residential solutions are built for smart everyday living. With UNA Automation, your home becomes intelligent, safe, and efficient, always under control, wherever you are.

Welcome to the era of **connected comfort.**

Products and solutions designed for your home

ELEVATE YOUR LIVING EXPERIENCE

Create a home that welcomes you with the right light, the perfect temperature, and intuitive control. With UNA Automation, every room becomes your ideal space, tailored to your needs, every moment of the day.

ELEGANCE AND TECHNOLOGY AT HOME

Combine high-end design with advanced control. Elegant interfaces, modern aesthetics, and seamless functionality bring beauty and intelligence into your daily life.

40 YEARS OF KNOW-HOW

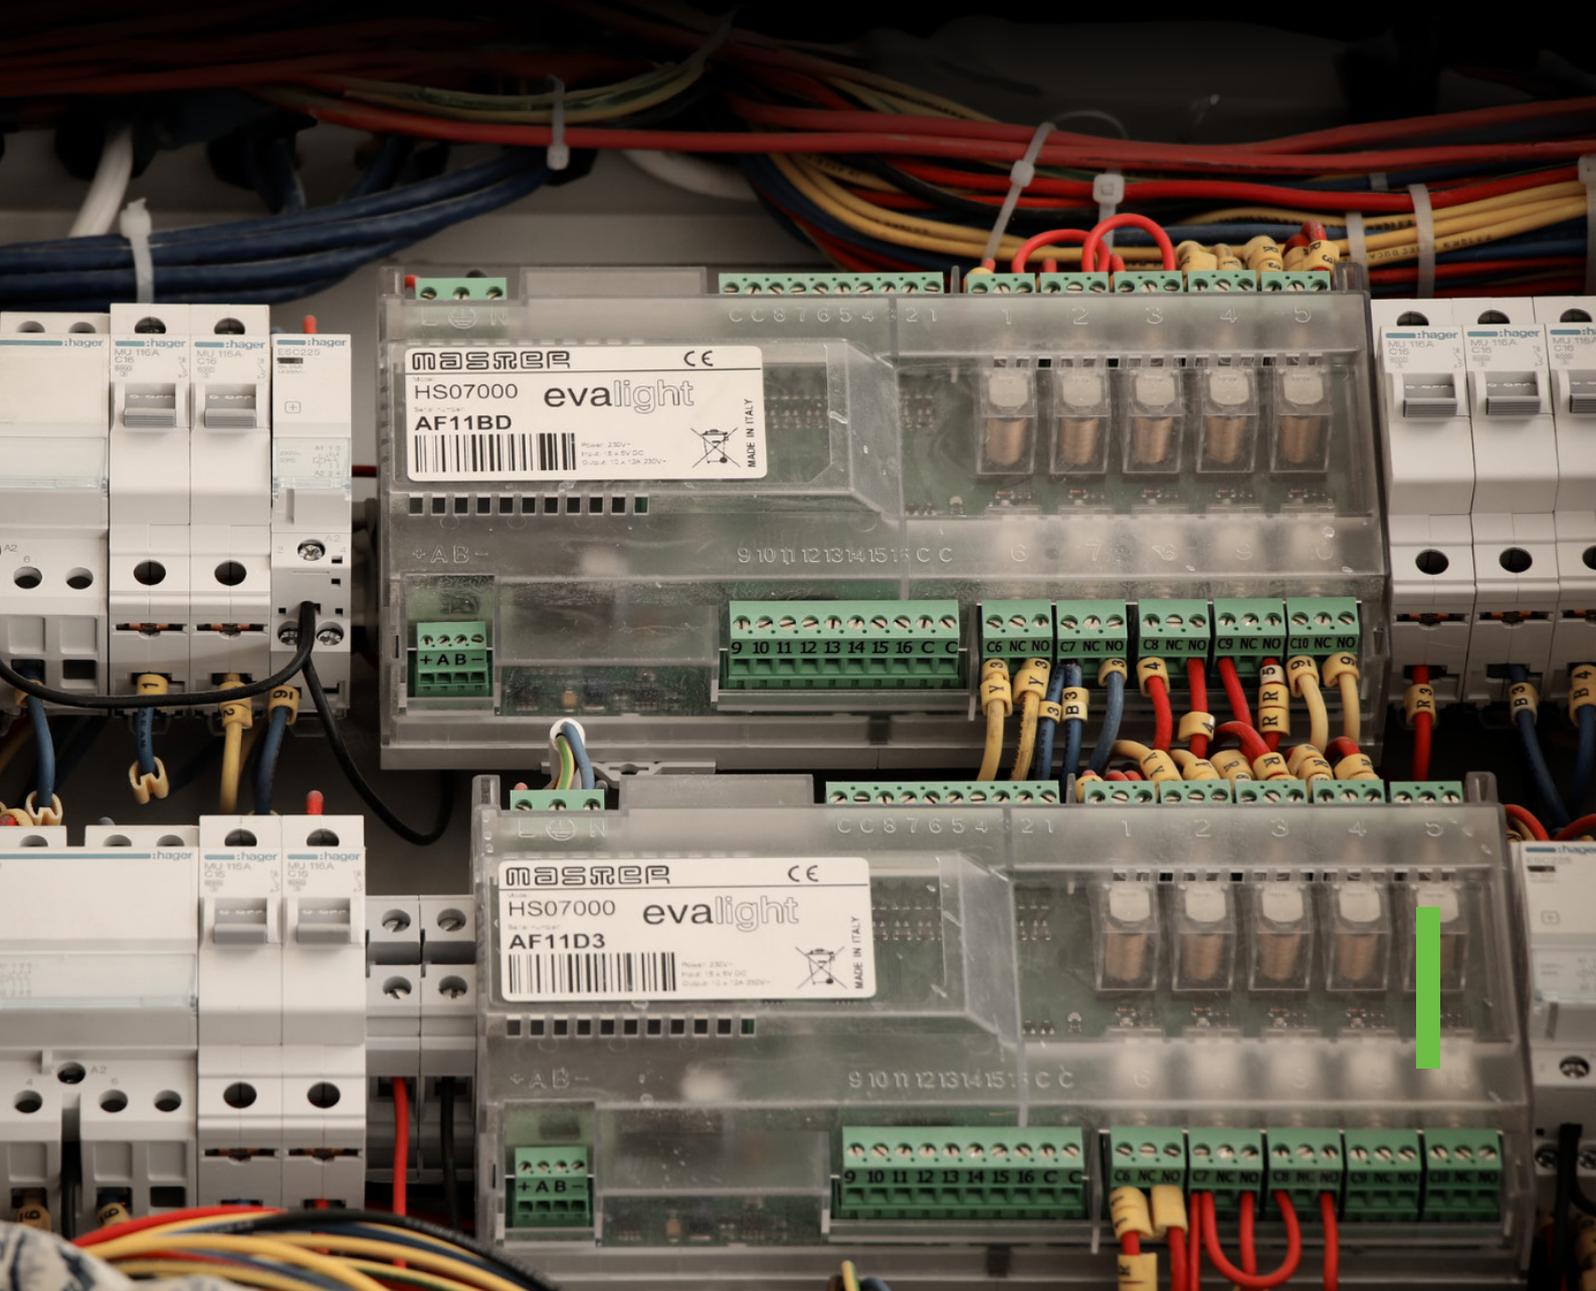

With over four decades of experience in automation and energy management, Master delivers Italian-designed solutions that are built to last and evolve with you.

Advanced Home Automation

By integrating smart automation technology, UNA transforms your house into an intelligent, responsive home.

Every element is designed to enhance comfort, optimize energy use, and simplify daily routines, offering cutting-edge solutions for **modern living**.

CENTRALIZED MANAGEMENT

The UNA Automation software provides a user-friendly platform to monitor and control your entire home.

From a single interface, you can manage lighting, temperature, shutters, appliances, energy usage, and security systems, locally or remotely.

Whether you're at home or away, your entire system is just a tap away.

Automation doesn't just make your home smarter, **it makes your life easier, more comfortable, and more sustainable.**

Empower your lifestyle.
Simplify your day.
Optimize your energy.

VESTA: the brain behind your home

Vesta is the core of your home automation system, offering precise, reliable, and connected control of your spaces.

Curtain and blind control

Smart temperature control

Lighting management

Alarm control

Personalized scenarios

Door and window contacts

Control every room directly from your smartphone, PC or tablet, thanks to the secure and intuitive UNA Mobile and SideraWeb platforms.

COMFORT STARTS WITH THE RIGHT LIGHT

Lighting that welcomes, guides, and adapts.

Your lights respond automatically: they turn on when you enter, follow your daily routine, and adjust to the mood you want to create: from a relaxed evening to a productive morning.

Whether through traditional switches, voice assistants, touch screens or the app, you can personalize every lighting scene in your home.

YOUR IDEAL TEMPERATURE, EVERY TIME

UNA Automation manages heating and cooling based on room occupancy, time of day, and your preferences. Each zone of your home stays exactly how you like it, warm in winter, cool in summer. With smart control, your comfort is automatic and your energy use is optimized.

Perfect climate, less waste.

SMART DETECTION THAT SAVES ENERGY

Presence sensors and contact points detect movement and activity in every room. They trigger lights, adjust temperature, and pause devices when you leave a space.

Your home reacts in real time, reducing unnecessary consumption while always ensuring comfort.

Awareness that works silently in the background.

LET IN THE LIGHT OR KEEP IT OUT: AUTOMATICALLY

Control curtains and blinds based on daylight, temperature, or time. Open them in the morning, close them in the evening, or let them respond to a custom scene. Privacy, energy efficiency, and ambiance are now synchronized with your lifestyle.

One touch or no touch at all: your home adjusts for you.

- POWER SUPPLY: 12V DC STABILIZED
- POWER CONSUMPTION: MAX 3 W
- COMMUNICATION PORTS:
 - 3 × RS-485 PORTS FOR UNA AUTOMATION DEVICES
 - 1 × LAN RJ45 PORT FOR REMOTE SUPERVISION (SIDERAWeb, LAPIS)
 - 2 × USB 2.0 PORTS FOR BACKUP, FIRMWARE UPDATES, AND EXTERNAL MODULES
- INTEGRATED FUNCTIONS:
 - CENTRALIZED MANAGEMENT OF THE ENTIRE UNA AUTOMATION SYSTEM
 - INTERNAL MEMORY FOR SCENARIOS, EVENT LOGS, ENERGY CONSUMPTION, AND CUSTOM LOGIC
- NTP TIME SYNCHRONIZATION VIA LAN
- FULLY COMPATIBLE WITH MASTER I/O MODULES, TOUCHSCREEN INTERFACES, AND MOBILE APPS
- DIMENSIONS: 115 × 115 × 58 MM
- INSTALLATION: DIN RAIL MOUNTING — 6.5 MODULES

One system, endless possibilities.

Every room in your home becomes smarter, more efficient, and more personal.

With UNA, you can create synchronized scenes that control lights, climate, shutters, and devices, exactly the way you want them.

From cozy bedrooms to open-plan kitchens, every space responds to your needs with just one command.

Design your home around your life.

Bedrooms

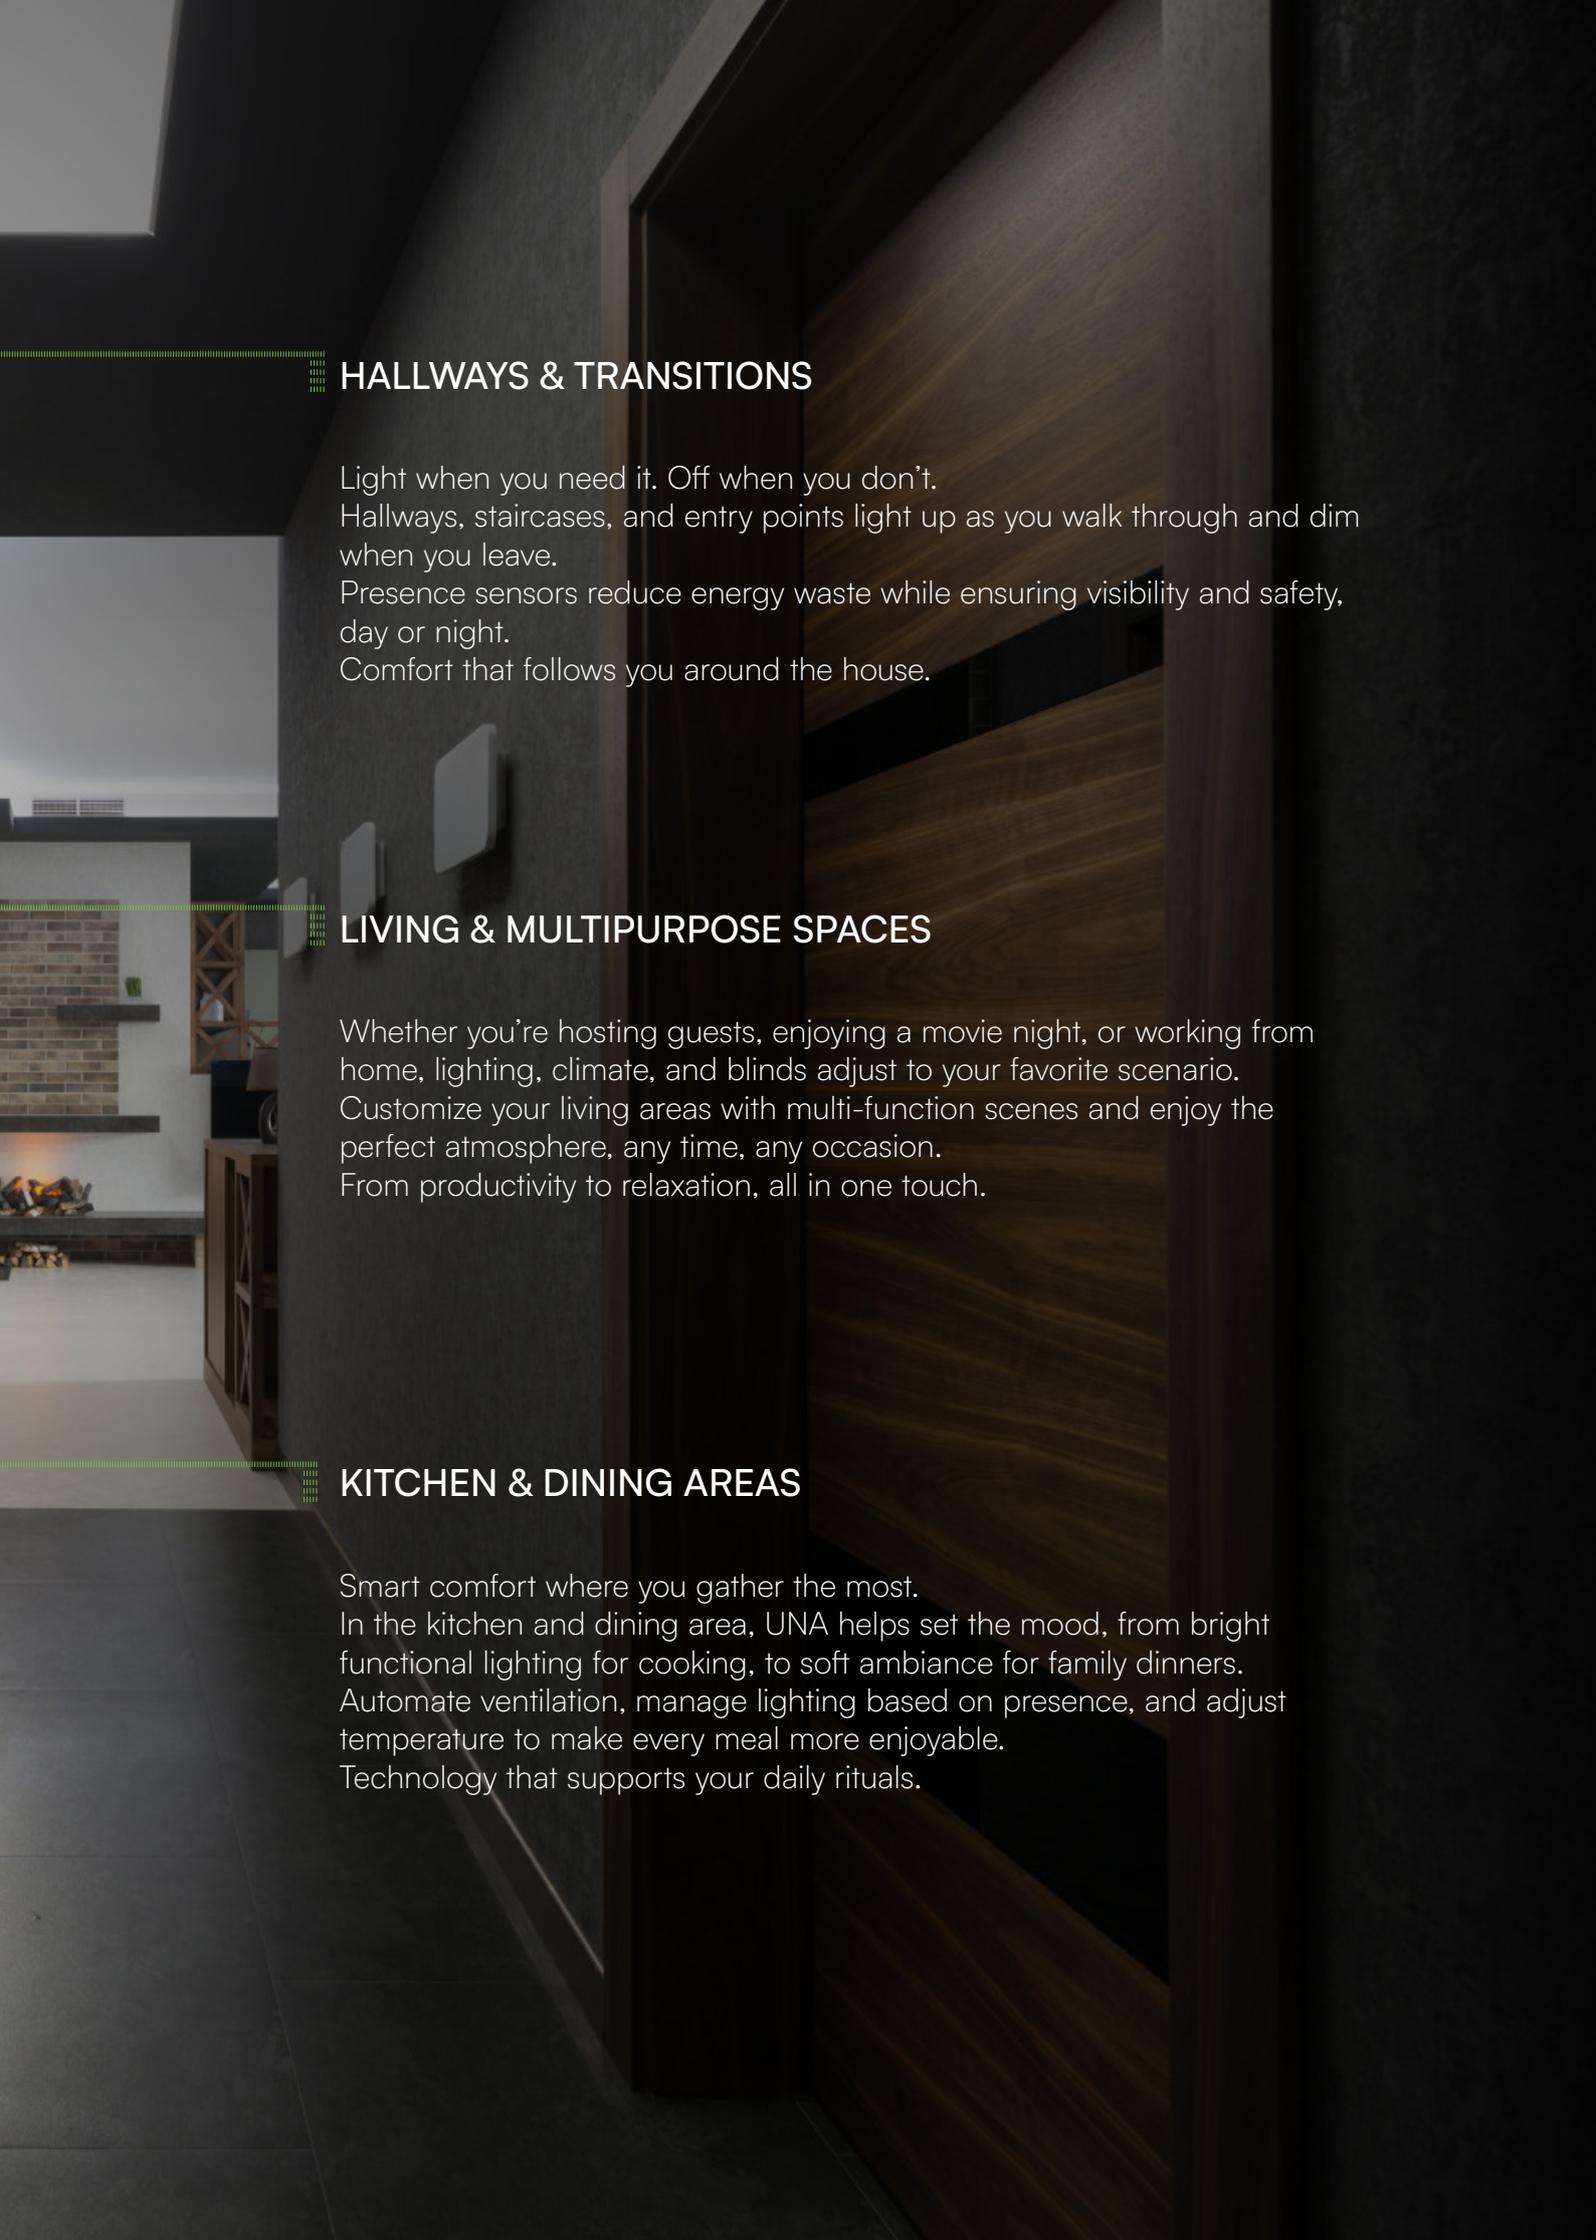

Corridors

Gardens and
outdoor areas

Kitchens and
living areas

HALLWAYS & TRANSITIONS

Light when you need it. Off when you don't.

Hallways, staircases, and entry points light up as you walk through and dim when you leave.

Presence sensors reduce energy waste while ensuring visibility and safety, day or night.

Comfort that follows you around the house.

LIVING & MULTIPURPOSE SPACES

Whether you're hosting guests, enjoying a movie night, or working from home, lighting, climate, and blinds adjust to your favorite scenario.

Customize your living areas with multi-function scenes and enjoy the perfect atmosphere, any time, any occasion.

From productivity to relaxation, all in one touch.

KITCHEN & DINING AREAS

Smart comfort where you gather the most.

In the kitchen and dining area, UNA helps set the mood, from bright functional lighting for cooking, to soft ambiance for family dinners.

Automate ventilation, manage lighting based on presence, and adjust temperature to make every meal more enjoyable.

Technology that supports your daily rituals.

When wiring isn't possible, UNA still is.

Z-Wave solutions for seamless expansion, no construction required.

Some homes can't be rewired.

Walls are finished. Ceilings are closed. But that doesn't mean you have to give up on comfort, control, or automation.

With Z-Wave technology, UNA Automation allows you to extend smart system functions wirelessly, making it the perfect solution for:

Renovations

Finished homes

Post-installation
upgrades

Apartments and
loft

Because technology
should adapt to your
home, not the other
way around.

Remote supervision with UNA Mobile

UNA Mobile offer intuitive platforms to manage your home wherever you are.

Access all functions in real time, from lighting and climate to security and automation, directly from your smartphone, tablet, or PC. Manage your home easily and securely through your protected network.

CHECK HOME STATUS

See what's happening at home: room temperature, lighting status, energy consumption, device activity: all in real time.

MANAGE FROM ANYWHERE

Trigger scenes, adjust climate, see the security camera or open a gate with just a tap, whether you're across the house or across the world.

SIMPLIFY DAILY MANAGEMENT

Receive alerts, monitor performance, and optimize comfort without lifting a finger.

Total control. Total peace of mind.

Discreet technology, lasting value.
UNA Automation adds elegance, efficiency, and intelligence,
making your home not just smarter, but truly yours.

Efficiency that pays off

Energy efficiency starts at home.

With UNA, every room reacts intelligently: lights switch off when no one's there, heating and cooling adjust to real-time needs, and power is managed according to availability and priority.

The result?

Lower bills

Automatic balancing of loads to prevent overuse and blackouts.

Smarter usage

Lights, sockets, and appliances turn off when no longer needed.

A more sustainable lifestyle

Track energy consumption and photovoltaic production to improve your efficiency every day.

*Sferia touch screen chronothermostat,
stand alone wifi configuration or integrable with
the UNA Automation home automation system*

Because a truly smart
home is one where
energy flows where it's
needed,
and nowhere else.

Accessory products

Details make the difference in a truly smart home. The UNA Automation system is enhanced by a range of functional accessories designed to blend into your home and expand its capabilities. Every element combines advanced control with timeless aesthetics.

Discover more about our smart wiring devices on: master.it/en

TOSCA 2

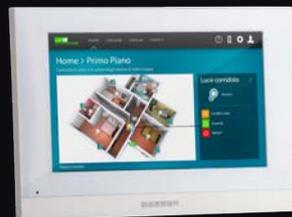

The Tosca 2 touch screen acts as the command center for your smart home.

With a 10" display and a refined design, it allows you to manage lighting, climate, custom scenarios, and security from a single interface.

MIMI

The Mimi 7" touch screen is designed for advanced home control. It offers complete and customizable management of indoor environments, allowing you to create and activate scenarios that perfectly adapt to your everyday needs.

PIXIA DEDICATED SMART BUTTONS

Pixia smart buttons represent the perfect fusion of design and functionality. Designed to provide intuitive and immediate control of smart home features, these customizable buttons allow you to activate scenarios, adjust lighting, or control blinds with a simple touch.

Their refined aesthetic makes them suitable for any environment, adding a touch of technological elegance to your home.

Invisible warmth. Total control. Low voltage.

UNA ThermaFloor is the electric underfloor heating solution designed to offer maximum comfort with total energy efficiency and seamless integration into the UNA Automation ecosystem.

Thanks to its modular structure and intelligent control, it adapts to the real needs of each room, creating a gentle, uniform warmth that feels natural, without the need for radiators or visible heating elements.

SMART TECHNOLOGY UNDER YOUR FEET

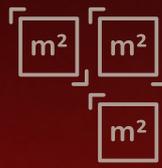

UNA ThermaFloor uses thin, flexible heating mats powered at extra-low voltage, connected to a dedicated transformer and managed through UNA Automation. Each zone can be individually controlled or integrated into scenarios such as “wake-up”, “eco mode” or “night comfort”.

Uniform, radiant heat with no visible devices

Compatible with ceramic, parquet, vinyl and laminate flooring

Maintenance-free, zone-programmable

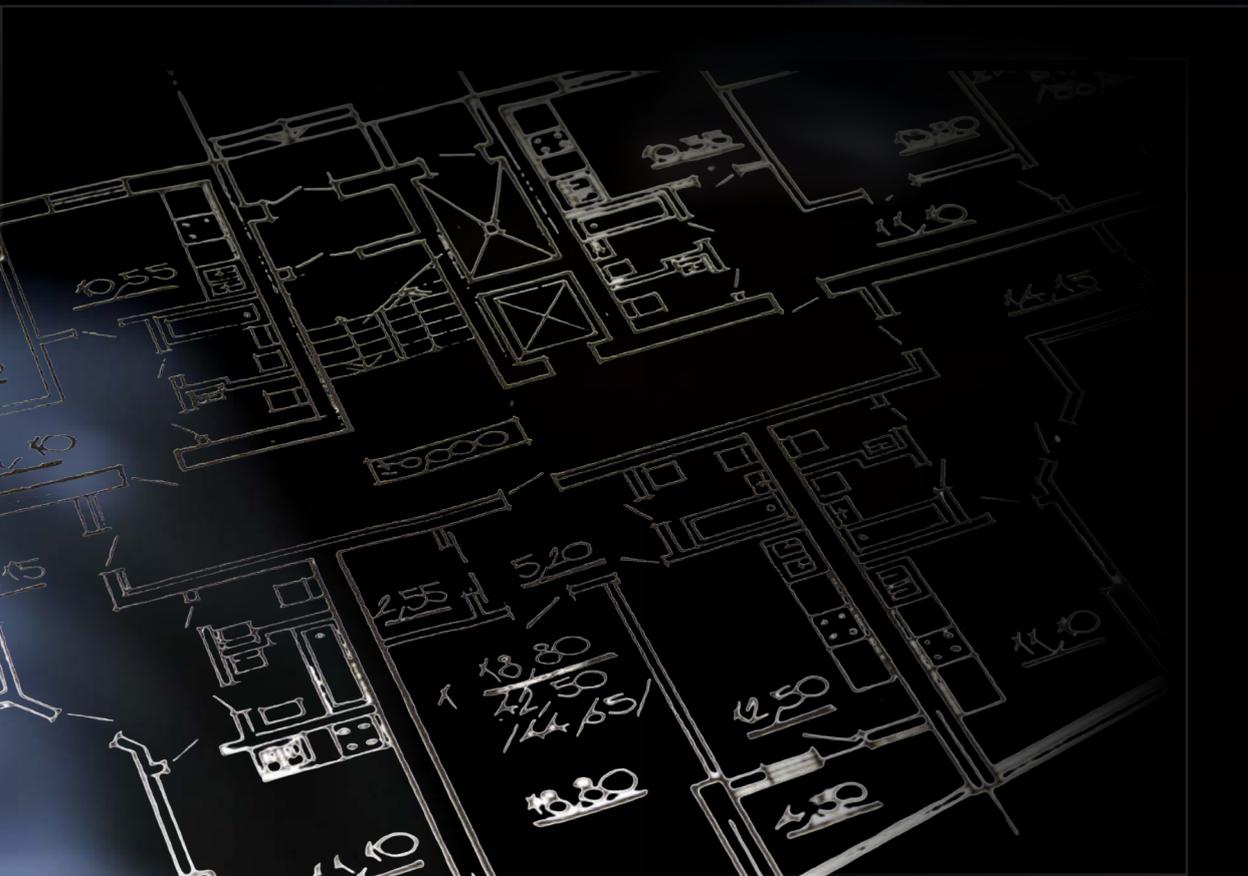

Thickness: 1,2mm

A solution for every home configuration

UNA adapts to your needs, from apartments to villas.
The system is modular and scalable, and every
configuration is fully customizable.

With Master, it's not just about automation, but about
bringing your vision to life, transforming every space into
an intelligent and perfectly optimized environment:
for you and for your family.

FEATURES

To make it easier to choose the solution best suited to your needs, the following table summarizes the main features included in each example of houses.

Each option is designed to offer a mix of comfort, efficiency and control, but **each solution is totally customizable**: you can always add or remove features based on your **specific needs**.
